American Board of Emergency Medicine

In-training Examination (ITE): Before the Exam
FREQUENTLY ASKED QUESTIONS (FAQs)

1. **When will the 2021 ITE be administered?** The 2021 ITE will be administered in an online format over an 11-day testing window, beginning on Tuesday, February 23, through Friday, March 5, 2021. The cost per resident is $125 USD. The extension of the testing window is to assist programs in accommodating a proctored exam during pandemic-related occupancy restrictions.

2. **How does an EM program pre-register for the ITE?** The ITE pre-registration begins via the annual EM program survey which opens the first week of July and ends October 31st each year. It is during the annual survey that the program director must indicate whether his or her program will participate in the next ITE.

3. **Can my program continue to administer the ITE to all residents on a single day, or do we have to administer the ITE across multiple days?** Programs that can handle online testing for all their residents on a single day can continue to do so. However, especially with an expanded testing window, programs may also choose to schedule as many administrations as needed during the administration window.

4. **Can programs administer the exam to their residents virtually (e.g., via Zoom)?** No. For both operational and psychometric reasons, and because the ITE is used as a predictor for the proctored Qualifying Examination for certification, the exam administration must be administered as an in-person, proctored exam.

5. **Who can take the ITE?** Any EM resident who is enrolled in an ACGME- or RCPSC-accredited EM program, and any resident in a Board-approved EM combined program during the testing window are eligible to take the ITE. Enrolled residents on leave are also eligible to take the ITE. See the Policy on ITE Accessibility for more information.

6. **What staffing is necessary to administer the online ITE?** ABEM has always recommended approximately one proctor for every 20 residents being tested and at least two proctors per session to allow for a back-up proctor in the case of an emergency. The actual testing time is 4.5 hours, but proctors must allow lead time to get everyone logged into the online administration. Please be prepared to staff the administration appropriately before, during, and after the examination.

7. **What are the technical systems requirements to participate in the online ITE?** The minimum systems requirements can be found here.

8. **How will our program know if we meet the minimum systems requirements?** A technical resource from your institution should review the systems requirements document and let you know if it is feasible to administer the online ITE at your scheduled testing location. If the testing location uses a Wi-Fi connection, be sure to let the technical resource know the number of residents that will be accessing the ITE simultaneously on the examination day so that they can determine if the wireless network has the capacity to handle the necessary number
of Wi-Fi connections. Closer to the examination administration, programs will have access to a testing portal and will run a formal system check to avoid issues the day of the test administration; see the minimum system requirements for more information.

9. **Our testing location does not have wireless access. Can we participate?** The best option for any institution is to use devices with a wired (Ethernet) connection to the network. Your location could work if it has a computer lab with enough capacity to test all residents at once, or your program can split the residents into multiple testing sessions within the administration window.

10. **Our testing location has wireless access, but the connection is slow and unreliable when large groups of people are online at the same time. Can we participate in the online ITE administration?** ABEM will email a technical resource link to participating programs well ahead of the examination date that will allow you to determine the capacity of your wireless network. If the capacity of your Wi-Fi network is limited, one option is to split up your residents into two or more groups, as long as all testing occurs within the designated testing window.

11. **Our institution has a computer lab with computers using a wired (Ethernet) connection, but there are not enough computers to accommodate all of our residents. Can we participate in the online ITE?** The most reliable option for any institution is to use devices with a wired (Ethernet) Internet connection. If you test your residents in two or more groups, you could administer the examination online if the testing sessions occur within the designated testing window. Also, residents can use their own devices in a room that has access to Wi-Fi if each device meets the minimum system requirements.

12. **Does our program need to have access to a computer lab with dedicated computers to participate in the online ITE?** No, any location with reliable Internet access can work. While computers with a wired (Ethernet) Internet connection are likely to be the most reliable and predictable, if your testing location has a reliable wireless network available it could work for the online ITE. Please see the minimum system requirements for more information.

13. **Our program administers the ITE off campus and/or it has foreign (non-U.S.) administrations. How will we be able to verify connectivity and that the online ITE will work there?** A technical resource at the off-campus/out-of-the-country location can review the minimum system requirements and complete the system checks. NOTE: All testing must be proctored.

14. **Does our program need to provide computers to all our residents for the online ITE?** No, residents can use their own computers, so long as 1) their equipment meets the minimum system requirements, and 2) they run a system test on their computer well in advance of the examination. The testing software is compatible with both Windows PC and iOS Macs. Residents should be given the systems requirements well before the examination to verify that their equipment can be used. In addition, approximately two weeks prior to the ITE administration, ABEM asks that all test takers download a secure browser and complete the system check from their home before coming to the testing site.
15. Many of our residents have only a tablet computer, not a laptop. Can they use a tablet to take the online ITE? Residents may use an iPad that meets the minimum system requirements to take the online ITE. Other tablet computers are NOT compatible with the testing software and cannot be used to take the exam.

16. Can residents use their smartphones to take the online ITE? No. Only Windows PCs, Mac laptops, and iPads that meet the minimum system requirements can be used to access the online ITE.

17. For residents who are unfamiliar with Apple devices, will ABEM provide information to assist them in downloading the ITE online application? ABEM will include an iPad Quick Start Guide when the ITE proctor manual is sent to the Chief Proctor. This guide summarizes the preparatory steps of installing the ABEM online application on an iPad.

18. When is the deadline for the final registration and payment for the 2021 ITE? ABEM must finalize ITE registration by January 26, 2021. (This follows the pre-ITE registration, which is completed October 31st.) Details related to final registration and payment are sent to all participating programs in early December. The 2021 ITE fee is $125 USD per resident. Again, the ITE final registration is available from the ABEM website from early December until January 26, 2021, in the same location as the online annual survey of residents. Offline payments, i.e., checks, are accepted.

19. Our program has a resident who will take the ITE at another accredited, participating EM residency program. How does the program communicate his or her site change? ABEM requires correspondence from both the resident’s home program director and the program director at the site where the resident will be taking the exam regarding the site change; updates can be emailed to training@abem.org and must be received by ABEM by January 26, 2021. There is no difference in scoring and all enrolled resident feedback will be included in the home program’s post-examination feedback reports.

20. Our program sometimes allows residents from other programs to take the ITE at our site. We have our residents use their own devices. How can we ensure that other programs’ residents’ equipment meets the minimum requirements? Residents who change their testing location to your site and are expected to use their own equipment should be given the minimum system requirements document and, in mid-February, should download the secure browser and complete the systems check from their home before coming to your testing site.
