ABEM has been speaking with emergency physicians during the past year about their experiences with the ConCert™ Examination (ConCert). Among those we spoke to were the leadership of every major EM organization,* including the leadership of AAEM, the ACEP Board of Directors, and 24 ACEP state chapters. Other feedback came from thousands of responses to ABEM surveys, including over 2,000 from 2017 ConCert test takers.

Physicians' opinions about the exam were fairly consistent: you want greater flexibility, enhanced relevance, and a reduction in the high-stakes nature of the exam. The ABEM Board discussed these requests and is developing an alternative to the ConCert. The alternative will consist of shorter, more frequent assessments. Each assessment will consist of one or several specific content areas such as trauma. Additional opportunities will be available to retake and pass an assessment, which will give physicians a clearer idea of what topics they need to review, rather than having to study the entire breadth of Emergency Medicine. In this way, the alternative will have more emphasis on learning new material and identifying content areas for improvement. ABEM will begin phasing in the alternative in 2020.

*Leadership of every major EM organization includes those of the American Academy of Emergency Medicine, the Society for Academic Emergency Medicine, and the Eastern Association for the Surgery of Trauma.
Not all physicians voiced concerns about the ConCert. Being able to take the exam during the last five years of certification without resetting the certification expiration date was a change implemented a few years ago and has been well received; last year, 43 percent of those taking the exam took it early. Beginning in 2019, the exam will be offered twice per year, which will increase the number of times physicians can take the exam, and further reduces the consequences of failing the exam in the final year of certification.

Under Development

Many details of the alternative are not yet defined, but ABEM wants to let physicians know the importance of what they told us and how we are responding. Over the next year, more details will be forthcoming. A few aspects that we are examining are the following:

• **How long will the assessments take?** Although the length of the assessments has not been defined, we think they will take about an hour to complete.

• **How many assessments will I have to take under the alternative method?** The number of assessments has not yet been determined. At this point, we envision that physicians who take them will be required to complete a certain number of them within all or part of their certification period. The certification period is likely to remain a ten-year cycle. The intent of the alternative is to allow physicians to determine the pace at which they complete the assessments.

• **Will they be administered in testing centers?** We are looking at the feasibility of the assessments being accessed remotely, although what this might look like is still being discussed.

• **Will I be able to look things up?** The use of some type of reference material is a possibility, as emergency physicians can often look things up in their clinical practices.

As we work to develop and better define the different aspects of the program, we will share them with you. Be sure to check the ABEM website for updates.
Results of Your Input

The alternative to the ConCert is a direct result of your input. It incorporates focused learning, puts a high priority on providing physicians flexibility in completing each assessment, and enhances the relevancy of test questions. Because it delivers greater opportunities to maintain certification, it increases career security. And because it maintains high standards, it protects and provides additional value to your certification.

We will continue to seek and use your input as we move forward. We will be sending a survey to solicit your thoughts, and you can always send a message to abem@abem.org. We look forward to hearing from you.

*Representatives from the following organizations met in October 2017 to discuss the ConCert and potential alternatives:

- American Academy of Emergency Medicine
- American Academy of Emergency Medicine/Resident Student Association
- American Board of Medical Specialties
- American College of Emergency Physicians
- Association of Academic Chairs of Emergency Medicine
- Council of Emergency Medicine Residency Directors
- Emergency Medicine Residents’ Association
- Residency Review Committee for Emergency Medicine
- Society for Academic Emergency Medicine
ABEM Maintenance of Certification Program

Beginning in 2019, the ConCert™ Exam will be offered twice per year. The exam can still be taken any time during a test administration in the last five years of certification. For physicians who do not pass the exam the first time, twice-yearly testing provides flexibility and additional opportunities to continue certification. Physicians who pass the exam early will not have their certification reset. Their current certificate will remain valid until the expiration date on their certificate, after which, a new, ten-year certificate will be issued.

Exam registration and administration dates for the 2018 and 2019 exams are as follows:

**2018 Exam**
- Administration: September 24-29, 2018
- Registration: currently open

**Spring 2019 Exam**
- Administration: March 8-14, 2019
- Registration opens: October 1, 2018

**Fall 2019 Exam**
- Administration: September 16-21, 2019
- Registration: TBD

**ACS Trauma CME Dropped for MOC Participants**

The American College of Surgeons (ACS) recently revised the criteria for trauma-related continuing medical education (CME) credits for ABEM-certified physicians working in ACS-designated trauma centers. Effective immediately, ABEM-certified physicians participating in MOC no longer need to acquire trauma-related CME credits to fulfill ACS trauma center verification requirements. This change applies only to CME requirements housed under the ACS designation. As a result, it is possible that you may have other CME requirements depending on state or local mandates. ABEM encourages you to speak with your administrator for further clarification. ABEM will continue to seek opportunities like this to add value to your certification.

**ConCert™ Offered Twice Per Year**

The Patient Safety LLSA ended March 1, 2018. If you registered for but did not complete the activity, you have until June 30, 2018, to apply your test fee to another ABEM LLSA. Send an email that includes your name and the LLSA that you would like to substitute and take to moc@abem.org.

**PS-LLSA**
ConCert Exam Alternative

In March, ABEM announced the launch of an alternative to the ConCert™ that will begin to be phased in during 2020. The alternative is being developed from extensive conversations with ABEM-certified physicians. The idea behind the alternative is for shorter, more frequent assessments that focus on one or more topics (e.g., trauma). The assessments will likely take an hour to complete, and a physician who does not successfully complete an assessment will be able to take it again. There are many aspects of the assessments that are still in development. Among those currently being explored are the feasibility of remote access to the assessments and the type of references that might be allowed. Additional information is included in the President’s Message, which begins on page 1. ABEM will post additional information about the alternative on its website as it becomes available.

Letter Available Refuting Merit Badge Requirements

ABEM provides a letter of support that may be submitted to hospital administrators to forego the mandatory completion of short courses or additional certifications (“merit badges”) often needed for hospital privileges. Physicians must be participating in the ABEM MOC Program to obtain the letter.

The letter, signed by each representative of the Coalition to Oppose Medical Merit Badges (COMMB), details specific activities that board-certified physicians perform to maintain certification. ABEM-certified physicians can now download the letter from their Personal Page on the ABEM portal by doing the following:

- Sign in to the ABEM portal at www.abem.org
- On the left navigation, click “Print Verification of ABEM Status” (1 in screen shot)
- Under letter type, click “General Coalition ABEM” (2 in screen shot)
- Click “Continue to Next Step” (3 in screen shot)

ABEM’s MOC Program is a rigorous form of continuous professional development that contains content critical to the practice of Emergency Medicine, including procedural sedation, cardiovascular care, airway management, trauma care, stroke management, and pediatric acute care. Certification therefore supersedes the need for certifications sometimes required for medical staff privileges or disease-specific care center designations.
Does Your Certification Expire in 2023?

If your certification expires in 2023, you have MOC requirements due by December 31, 2018. By that date, you must have passed 4 LLSA tests, completed and attested to an average of 25 AMA PRA Category 1 Credits™ per year, and completed and attested to 1 Practice Improvement activity. If you do not complete your unmet MOC requirements by this date, you will not lose your ABEM certification; however, ABEM is required to designate and publicly report that you are “not participating in MOC.”

To view your requirements, go to www.abem.org, and sign in using your User ID and Password.

CME for ABEM Activities

The certification and MOC activities for which you can obtain CME credit continues to grow. Those opting for the 2018 EM LLSA CME Activity will receive 12.5 CME credits. For those working in specialty-designated centers, 2.0 credits are pediatrics, 2.0 stroke, and 1.0 trauma.

Since 2012, 60 CME credits have been available from the AMA for passing the ConCert™ Examination, and now the exam also has specialty-designated credits: For the 2017 exam, 9.5 credits are designated as pediatrics, 2.0 as stroke, and 10.25 trauma.

For a list of all the ABEM activities and associated CME credits, go to the ABEM website at www.abem.org/CMEforMOC.

LLSA Has New Look and Feel

A new platform for the LLSA was launched beginning with the 2018 test. The interface is more intuitive and easier to use, and is fully responsive to all devices, including mobile devices. ABEM welcomes feedback on the look and feel of the new interface, which can be sent to llsafeedback@abem.org.

Does Your Certification Expire in 2018?

If your certification expires in 2018, you must complete your MOC requirements by December 31, 2018, to renew your certification. In addition to passing the ConCert™ Examination, all LLSA, CME credit, and Improvement in Medical Practice requirements must be completed by the end of the year.
Projects and Activities

Recognizing 30 Years of Board Certification

In recognition of their dedication to the specialty of Emergency Medicine (EM), commitment to continuous professional development, and the provision of compassionate, quality care to all patients, ABEM acknowledges physicians who have marked 30 years of being ABEM board certified with a special certificate. The 2018 recipients are physicians who were board certified for 30 years as of December 31, 2017.

ABEM congratulates the 649 ABEM-certified physicians who recently accomplished this milestone! A list of the recipients is included on pages 14-15, and is also available on the ABEM website. Certificates are awarded annually to diplomates who reach this landmark.

Nominees Sought for ABEM Board of Directors

The Board of Directors will elect two new members at its February 2019 meeting. One position will be elected from nominations submitted by the Society for Academic Emergency Medicine, and one position from nominations submitted by the Emergency Medicine community-at-large. Nominations are due to ABEM by December 1, 2018. Nominee requirements and a list of required documentation is available in the “About ABEM” section at www.abem.org.
Clinical Ultrasonography

ABEM has submitted an application for a Designation of Focused Practice (DFP) in Clinical Ultrasonography to the ABMS Committee on Certification (COCERT). If approved, the DFP will offer broader availability for recognizing this evolving area of procedural expertise. The application will be reviewed at the COCERT meeting in September 2018.

New ABEM Website

ABEM has launched a new public website. The look and feel has been refreshed and the navigation updated to help you more easily locate the information you seek. We hope you have the opportunity to take a look around at www.abem.org. We welcome your questions, comments, and suggestions, which can be shared with communications@abem.org.

Neurocritical Care Medicine

The American Board of Psychiatry and Neurology (ABPN) has submitted an application to the ABMS for subspecialty certification in Neurocritical Care Medicine (NCC). ABEM has joined as a co-sponsor for NCC with the ABPN. If approved, ABEM-certified physicians will have the opportunity to receive subspecialty certification in NCC. Additional information will be posted on the ABEM website as it becomes available.

2017-19 ABEM NAM Fellow

The National Academy of Medicine recently named Mahshid Abir, M.D., M.Sc., the 2017-19 ABEM Fellow. Dr. Abir is an assistant professor in the Department of Emergency Medicine at the University of Michigan, and director of the acute care research unit at the Institute for Healthcare Policy & Innovation in Ann Arbor, Michigan. During her two-year fellowship, Dr. Abir will collaborate with researchers, policy experts, and clinicians, and help facilitate initiatives convened by the National Academies to provide nonpartisan, evidence-based guidance to national, state, and local policymakers, academic leaders, health care administrators, and the public.

Mahshid Abir, M.D., M.Sc.
Meet the New Directors!

At its winter 2018 meeting, the ABEM Board of Directors elected two new directors: Felix K. Ankel, M.D., who was nominated by the American College of Emergency Physicians (ACEP), and Diane L. Gorgas, M.D., who was nominated by the Emergency Medicine community-at-large. They will begin their terms as ABEM directors at the close of the summer Board of Directors meeting.

Felix K. Ankel, M.D.

College: University of Wisconsin, B.A.
Medical School: University of Wisconsin, M.D.
Residency: Emergency Medicine, University of Illinois
Clinical Position(s): Regions Hospital Emergency Medicine Residency, St. Paul, Minnesota
Academic Appointments: Vice President, Health Professions Education, HealthPartners; Professor of Emergency Medicine, University of Minnesota
Research/Clinical Interests: Competency-based medical education
ABEM Activities: Oral Certification Examination: Examiner (2000-present), Team Leader (2017-present); Item Writer, LLSA (2010-present)
Certification: Emergency Medicine, continuous since 1994

Diane L. Gorgas, M.D.

College: College of Wooster, B.A.
Medical School: Case Western Reserve University, M.D.
Residency: Emergency Medicine, University of Cincinnati
Clinical Position(s): Wexner Medical Center, The Ohio State University
Academic Appointments: Professor and Vice Chair of Academic Affairs, Department of Emergency Medicine; Director, Office of Global Health, The Ohio State University
Research/Clinical Interests: Educational methodologies, global health, disparities of care, women and infant health equity, obstetrical and newborn emergency care
ABEM Activities: Oral Certification Examination: Examiner (2000-present), Team Leader (2013-present); Member, Case Development Panel (2015-2017) and Chair, Modified Singles Advisory Panel (2018-present); Item Writer, In-training Examination (2011-present)
Certification: Emergency Medicine, continuous since 1995
EMS Examination Committee

The EMS Exam Committee met November 15, 2017. Among the decisions made by the Committee were approval of a job survey that will be sent to EMS physicians and potentially used to revise the Core Content of EMS Medicine. Peter T. Pons, M.D., has been appointed Chair-Elect of the Committee effective January 1, 2018. Recognition was given to Committee members whose terms expired December 31, 2017: Jane H. Brice, M.D., and Carol A. Cunningham, M.D. New members, whose terms started January 1, 2018, are Douglas F. Kupas, M.D., and Alexander P. Isakov, M.D.

Medical Toxicology Subboard

The MedTox Subboard met November 29-30, 2017. Among the Subboard’s work was developing pre-test questions for the MedTox LLSA. The Subboard also recognized members whose terms ended effective December 31, 2017: Michele Burns, M.D. (ABP appointee), Daniel A. Goldstein, M.D. (ABP appointee), and Daniel L. Sudakim, M.D. (ABPM appointee). New members, whose terms started January 1, 2018, are Diane P. Calello, M.D. (ABP), Michael J. Greenberg, M.D. (ABPM), and Robert G. Hendrickson, M.D. (ABEM).
ACCM and EMS Practice Pathway Closures

The practice pathway for Anesthesiology Critical Care Medicine (ACCM) will close August 30, 2018. To be considered eligible under this pathway, all training and practice must be completed by June 30, 2018.

The practice pathway for Emergency Medical Services (EMS) will close July 1, 2019. To be eligible under this pathway, all training and practice must be completed by June 30, 2019.

If you have any questions, please contact subspecialties@abem.org, or 517-332-4800, ext. 387.

Emergency Medicine Board Eligibility

Board eligibility is a five-year period that starts on the date a physician graduates from an Accreditation Council for Graduate Medical Education– or Royal College of Physicians and Surgeons of Canada–accredited EM residency program, or an ABEM-approved combined residency program. Physicians will not have any additional eligibility requirements under the Policy on Board Eligibility if they apply for certification, take and pass the first Qualifying Examination available to them, and take and pass the first Oral Certification Examination assigned to them. Details are available in the Become Certified section of the ABEM website (www.abem.org).

Note that physicians should not rely solely on ABEM reminders, and are subject to all requirements and policies.

If you have questions, please email BoardElig@abem.org or call 517-332-4800, ext. 384.

Subspecialty Board Eligibility

Board eligibility for subspecialty certification starts when a physician completes his or her training or practice required to meet the ABEM subspecialty eligibility criteria and ends when the physician achieves subspecialty certification. If a physician does not become subspecialty certified, board eligibility ends seven years after it started, or through four administrations of the subspecialty initial certification examination, whichever is longer.

To be considered subspecialty board eligible, a physician must be certified by an ABMS Member Board and designated as participating in MOC for their primary ABMS certification. If you have questions, please email Subspecialties@abem.org, or call 517-332-4800, ext. 387.
Oral Examiner Awards, Fall 2017

During the opening General Session at each Oral Certification Examination (OCE) administration, ABEM presents awards to oral examiners based on the number of examinations in which they have participated. In acknowledgement of their generous service to the Board’s examination process, ABEM recognized 26 examiners at the fall 2017 OCE. The Board of Directors sincerely appreciates the many contributions these individuals have made over their years of service to ABEM’s OCE program. The awards were presented by Terry Kowalenko, M.D., President, and Jill M. Baren, M.D., Chair of the Test Administration Committee, on behalf of the Board.

CLOCK – 8 Exams
Dr. Kowalenko (left) and Dr. Baren (right) present the award to Sam S. Torbatti, M.D.; Philip N. Salen, M.D.; David M. Donaldson, D.O.; Charles S. Grafeo, M.D.; Earnest E. Wang, M.D.; Barry J. Knapp, M.D.; Kerri L. Mason, M.D.; Melissa W. Costello, M.D.; Gary F. Pollock, M.D.; Christopher B. Colwell, M.D.; Mathew Griffin, M.D.; Kerin A. Jones, M.D.; and Cai Glushak, M.D. Not pictured: Richard E. Wolfe, M.D.

HOURGLASS – 24 Exams
Dr. Kowalenko (left) and Dr. Baren (right) present the award to Michael S. Beeson, M.D.; Philip L. Henneman, M.D.; and John F. Tucker, M.D.

TELESCOPE – 40 Exams
Dr. Kowalenko (left) and Dr. Baren (right) present the award to Richard M. Feldman, M.D.

PLAQ U E – 16 Exam s
Dr. Kowalenko (left) and Dr. Baren (right) present the award to Joel M. Bartfield, M.D.; Henry D. Unger, M.D.; John R. Joseph, M.D.; Jeanne M. Basior, M.D.; Kathleen M. Cowling, D.O.; Dick C. Cuo, M.D.; and Ralph N. Terpolilli, M.D.

PEN AND PENCIL SET – 32 EXAM S
Dr. Kowalenko (left) and Dr. Baren (right) present the award to Jorge del Castillo, M.D.
