 Learning Modules

MODULE QUICK START GUIDE

MODULE PREPARATION

- View the [MyEMCert](#), [MyEMSCert](#) or [MyToxCert](#) study points.
- Review the module reading materials.

MyEMCert [Key Advances](#)

MyEMSCert [Knowledge Advancements](#)

MyToxCert [Knowledge Advancements](#)

MySonoCert [Reading List](#)

- Block off time and choose a location where you can focus.
- Use the tools you normally would on shift as references.
- As an open-book assessment, study requirements should be minimal.

SYSTEM CHECK

Device and Browser

Use a PC or laptop NOT a Chromebook, phone, tablet, or iPad. Make sure your browser is on the most current version of Chrome.

Two-Factor Authentication

Set up two-factor authentication in your [MyABEM Portal](#) to access modules.

1. Click “MyABEM Sign In” at the top right of your screen.
2. Enter your User ID and your password
3. Click “Send Verification Code”

If You Don’t Get the Code

If you do not receive your code via email within 2 minutes, click “send new code”

REGISTRATION

1. Choose "Activities" from your MyABEM dashboard
2. Click on the "Register" link under the MyEMCert Assessment section
3. Follow the on-screen instruction prompts

Register for a Demo Module

Take a no-cost, no-risk, MyEMCert or MyEMSCert demo module. Learn how the modules work and view sample questions. You will not receive a score for the demo module, it is solely for practice. Note that if you take the demo module, you must complete it before you can register for other modules.

TIME LIMIT

You will have 4 hours total time to complete each module.

Save Your Progress

- Always confirm your answers before pausing the module or before the 15-minutes time-out due to inactivity.
- Unconfirmed answers will be marked incorrect and you will continue on the next question.

Don't Delay

Registering for a module gets you three attempts to pass it. Because there is only one new version available per calendar quarter, failing a module means it could take up to three months for another attempt. Don't wait to complete all your module requirements in the final year of certification.

HONOR CODE

Before you can take a module, you will be prompted to agree to an honor code.

You Are Agreeing To

- ✓ Taking the module by yourself with no help from anyone else.
- ✓ Not sharing questions, rationales, or other test information.

STARTING A MODULE

Once you have registered for a module, you can take it at a time convenient to you. We encourage you to take the demo module first.

How to Start a Module

In your MyABEM portal, click on the “Start Assessment” button for the module you want to start.

Note: You need to complete the active module before starting another module. This includes the demo module.
